

Code42 CrashPlan Installation

Mac

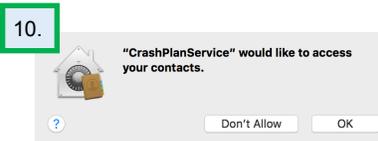

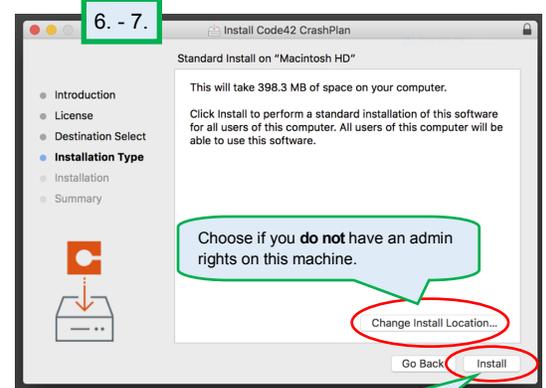

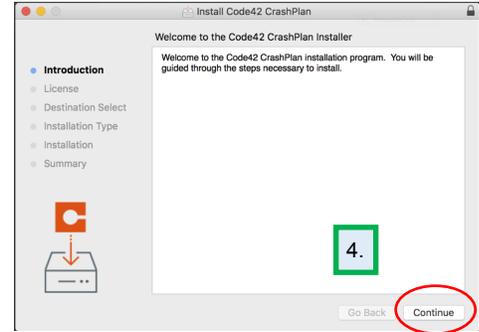

Before you begin: Check your [system requirements](#).

Older machines may install the version 4 Code 42 client ([version 4 system requirements](#)). *

1. Copy Installer file to computer.
2. Double-click **DMG** file 
3. Double-click **Install Code42 CrashPlan** 
4. Click **Continue** Button.
5. The License Agreement appears. Click **Continue**, and then **Agree**.

SKIP Step 6 if you have **Admin** rights on your machine.

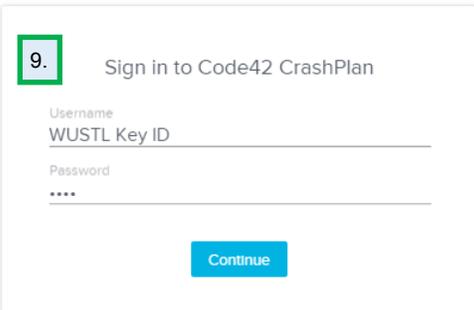

6. If you **do not** have admin rights on the machine, choose **Change Install Location**. Then choose **Install for Me Only**. Click **Continue**.
7. Click **Install**.
8. If you are installing as an admin (you skipped step 6), you will be prompted for your admin credentials. Enter credentials and click **Install Software**.
9. The Code42 login window appears. Log in using your **WUSTL key ID** and password. *

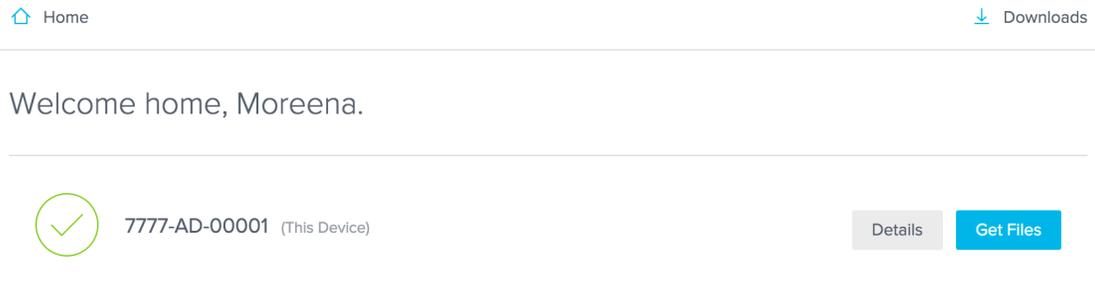

10. Code42 will request access to contacts, reminders, and calendars. Click **OK** if you would like those files backed up.

Skip Change Install Location only if you have an admin account on machine. Allows backup for all user accounts on machine.

11. Backup begins automatically. This process may take quite a few hours, depending on the amount of data to be backed up.

12. The Code42 dashboard will display a green check mark when backup is complete. Although backup is complete, you may need to wait 30 minutes for your files to appear for download/restoration on the Code42

* You may have multiple devices backed up using your Code42 account. The first time you sign into a new device using the Code42 CrashPlan app, you will be asked if this is a new device to be added to your profile, or if you are replacing an old device. **You will only see this window if you are currently using Code42 to back up another device.** Choose Replace Existing if you are using the new device instead of the old device. The Replace Device Wizard will guide you through the process. Choose Add New Device if you will be using this device in addition to previously backed up devices. For help with replacing devices, go to https://support.code42.com/CrashPlan/5/Configuring/Replacing_Your_Device
