

WU-PE-CGS TOOLKIT

User Guide

- 1 Review the PE-CGS Overview Brief to learn more about the PE-CGS Network funded by the National Cancer Institute
- 2 Determine if you have patients or survivors in your network who may be eligible to participate in WashU's study (adults with cholangiocarcinoma, Black Americans under age 50 with colorectal cancer, Black Americans with multiple myeloma)
- 3 Print the "General Flyer" or the specific cancer flyer appropriate for your patient population
- 4 Distribute the flyers to patients who may be interested in participating in the study to receive genetic testing and help reduce health inequality in groups with rare and understudied cancers
